

Wood Processing/Fire-Making Skills Workshop

Date: Sunday, December 12, 2021

Time: 2:00 – 4:00 p.m.

We'll gather, discuss, and work wood processing techniques by the Large Pavilion and practice fire-starting techniques in the large adjacent BBQ pit.

I'll bring a host of tools to try for woodworking, tinder bundle material, fire-steels, etc., and everyone is encouraged to bring their favorite maul, hatchet, knife, fire-making tools, etc., to share techniques and try out. WEARING of PROTECTIVE EARWEAR and GLOVES when chopping and sorting wood of any size is highly encouraged for all who attend. Chaps/leg protection is not required as we will not be using any chainsaws.

Questions, please contact Matt Michaelson at mtmichaelson@hotmail.com
